EXPERIMENT 6: WORKFLOW AUTOMATION USING DELUGE

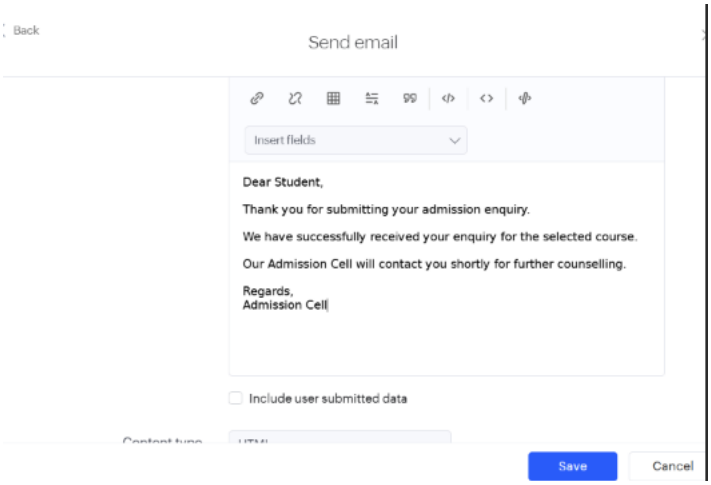

Aim

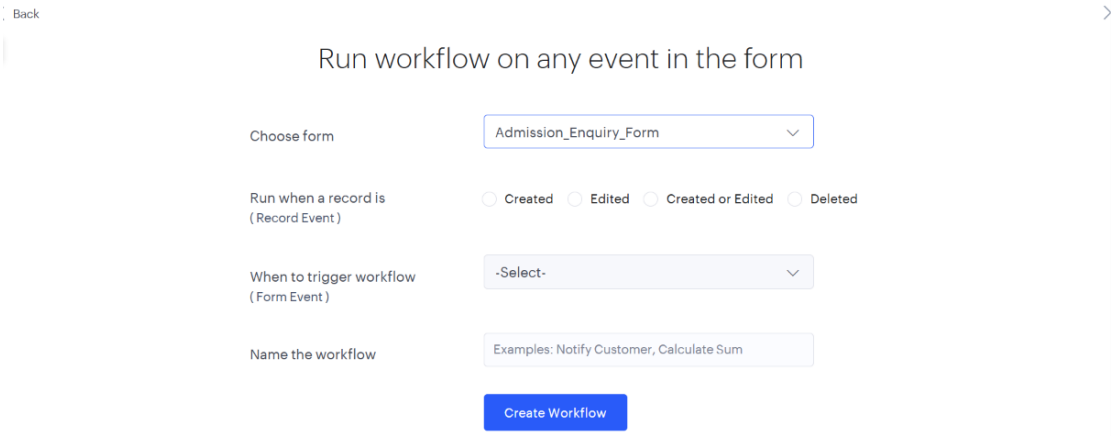

To design and implement workflow automation in Zoho Creator using Deluge scripting to automate admission enquiry processing, send acknowledgement emails, and reduce manual effort in the student admission process.

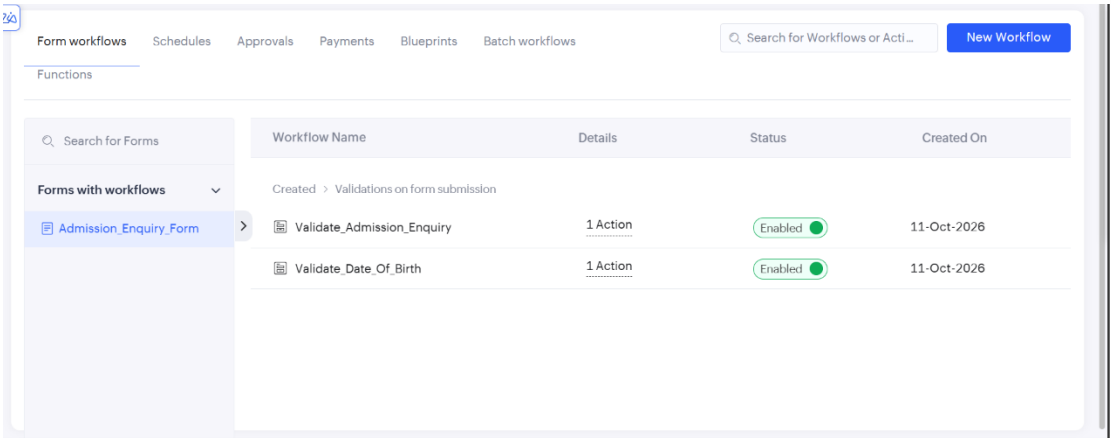

Procedure

1. Log in to Zoho Creator and open the existing **Student Admission Enquiry Management** application.
2. Navigate to the **Workflows** section in the application editor.
3. Create a new Form Workflow using the existing Admission_Enquiry_Form.
4. Name the workflow On_Enquiry_Submit_Workflow.
5. Configure the workflow to execute when a new admission enquiry record is added.
6. Add a Deluge script action to the workflow.
7. Write a Deluge script using the sendmail task to send an acknowledgement email to the applicant after form submission.
8. Configure the email recipient, subject, and message using the appropriate form fields.
9. Save the Deluge script and workflow.
10. Open the application and submit a test admission enquiry using a valid email address.
11. Check the email inbox to verify whether the acknowledgement email was received.
12. Verify that the workflow executes successfully when a new enquiry is submitted.

SCREENSHOT:

RESULT:

Thus, a Form Workflow was configured in Zoho Creator using Deluge scripting to automate the acknowledgement email process for student admission enquiries, reducing manual effort and improving communication with applicants.
