EXPERIMENT 5: REPORTS, DASHBOARDS, AND UI BUILDER

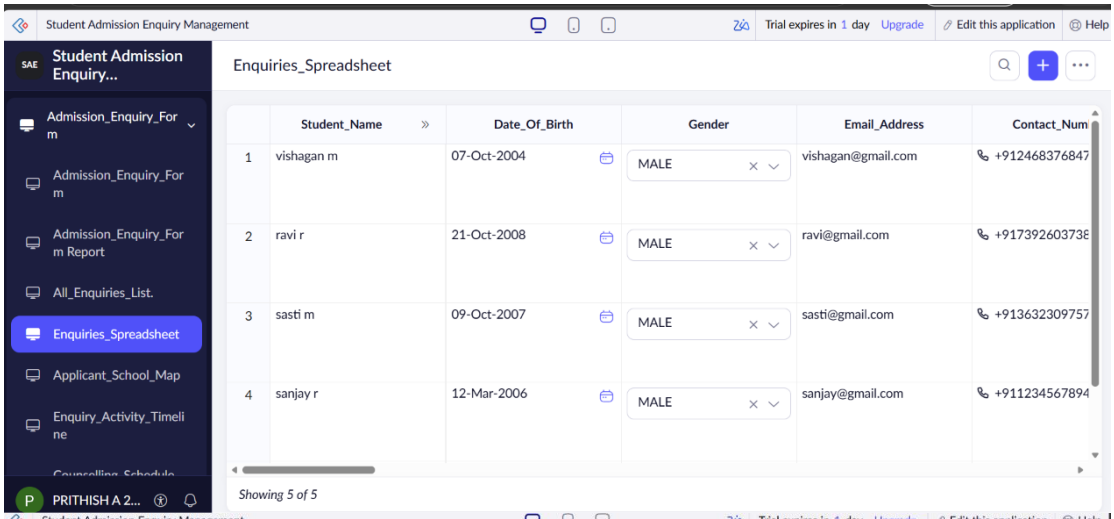

Aim

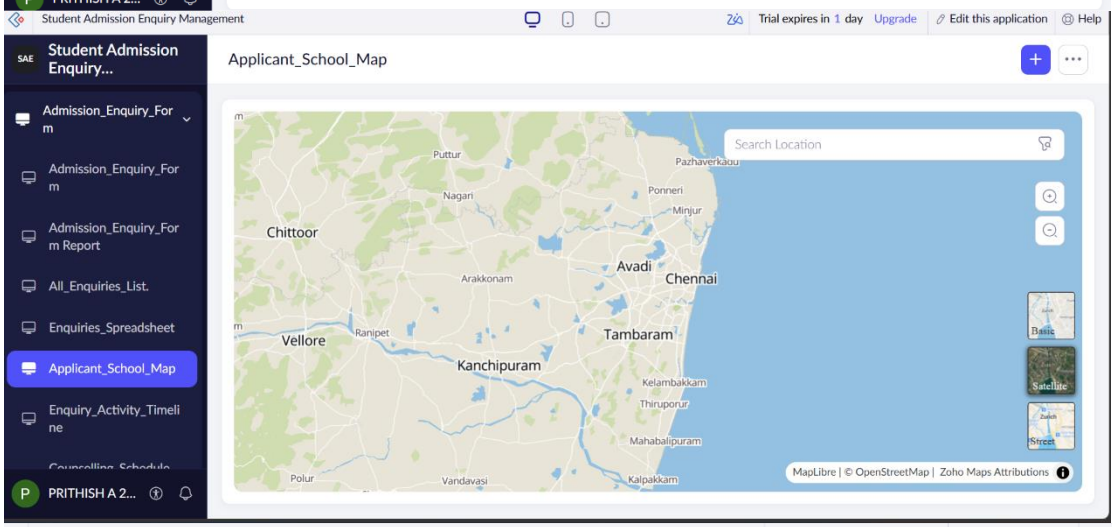

To develop reports and dashboards in Zoho Creator by connecting to application data, creating different types of reports, and designing interactive visualizations for effective data analysis and presentation.

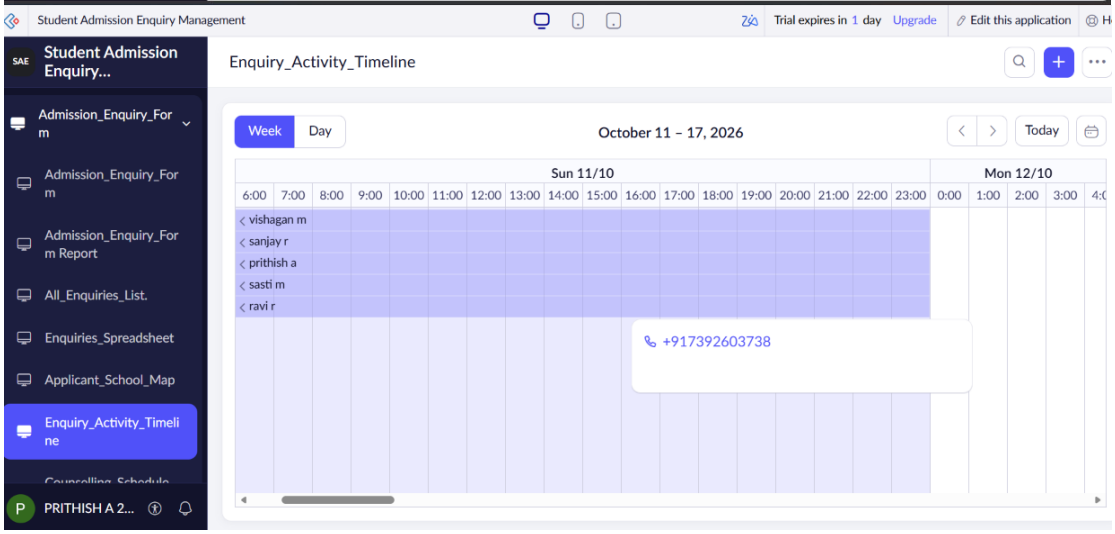

Procedure

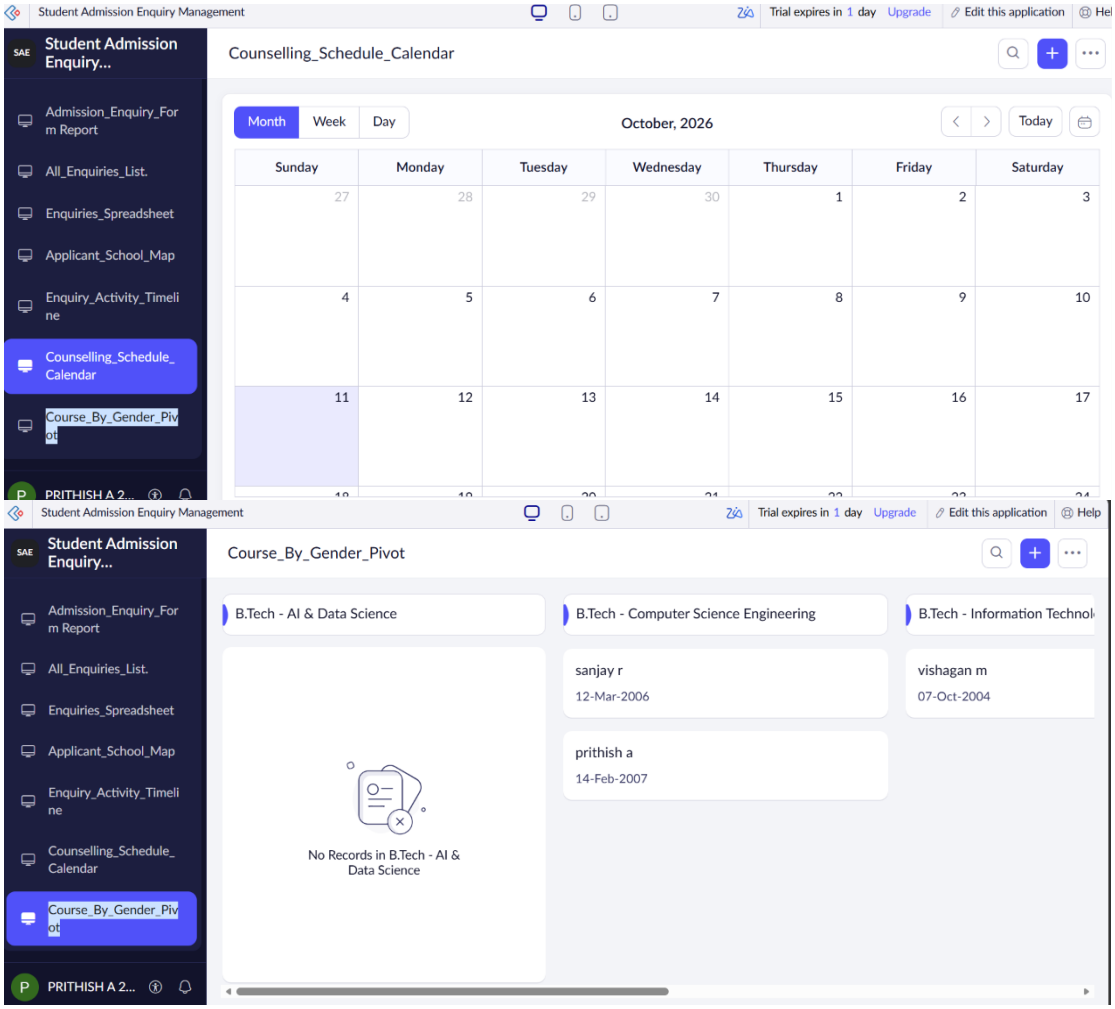

1. Log in to Zoho Creator and open the existing **Student Admission Enquiry Management** application.
2. Open the **Reports** section and create a List View to display student names, preferred courses, gender, percentages, and enquiry status.
3. Create a Spreadsheet View to display admission enquiry records in a tabular format and enable editing of selected fields.
4. Create a Kanban View to organize enquiries according to their current status.
5. Create a Calendar View to display counselling schedules based on the scheduled counselling date.
6. Create a Map View to visualize applicant locations using residential address information, if supported by the available address fields.
7. Create a Timeline View to display enquiries according to their submission dates.
8. Create a Pivot Table to analyze the number of enquiries by preferred course and gender.
9. Create a Chart View using a bar chart to compare the number of enquiries for different courses.
10. Create a Summary View to display course-wise enquiry counts and average Class XII percentages.
11. Configure a dashboard or page to display the required reports and visualizations together.
12. Test the reports using sample admission enquiry records and verify that the data is displayed correctly.

RESULT:

Thus, different types of reports and visualizations were created in Zoho Creator for the Student Admission Enquiry Management application. The reports and dashboard help organize, analyze, and present admission enquiry data effectively.
