EXPERIMENT 8: USER MANAGEMENT AND ROLE-BASED ACCESS CONTROL

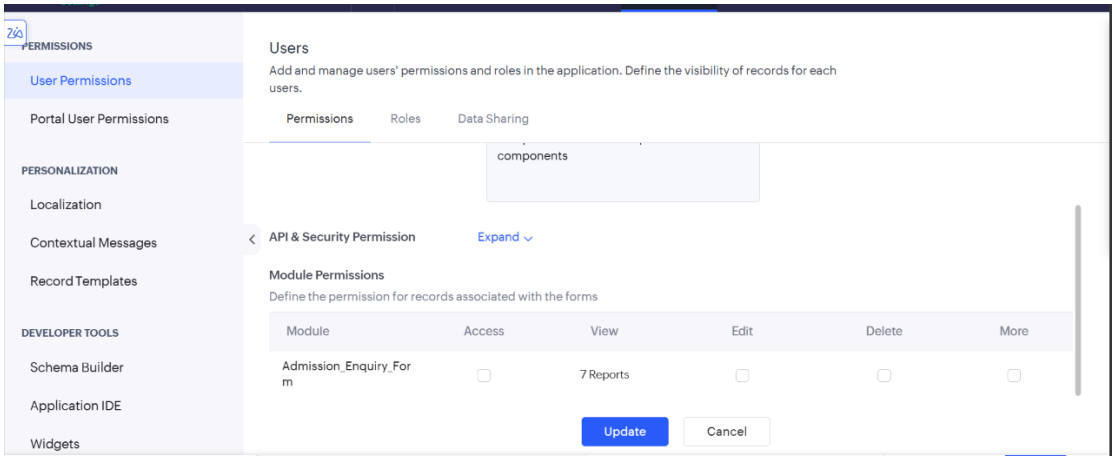

Aim

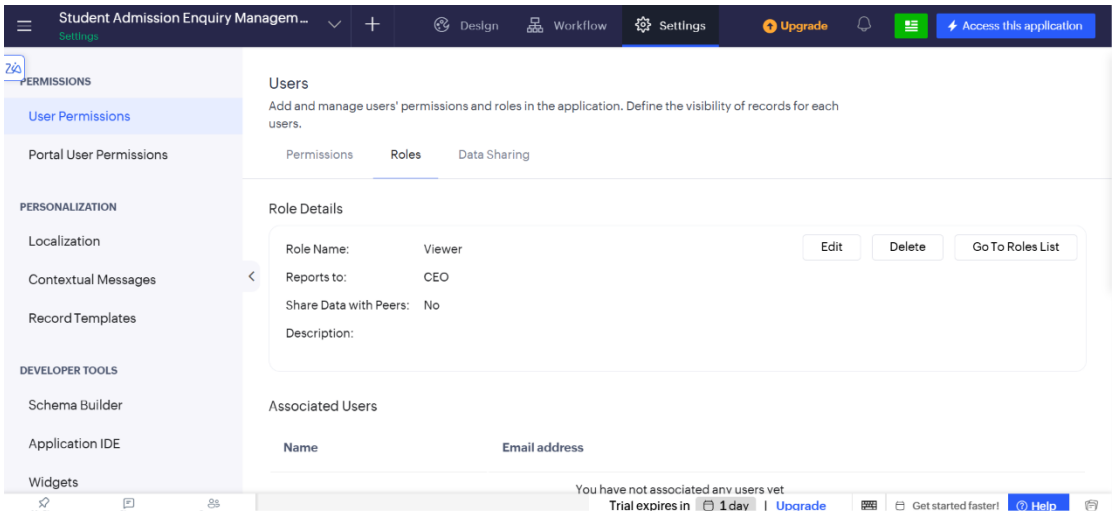

To implement user management and Role-Based Access Control (RBAC) in Zoho Creator by creating user roles and configuring permissions to control access to application forms and reports.

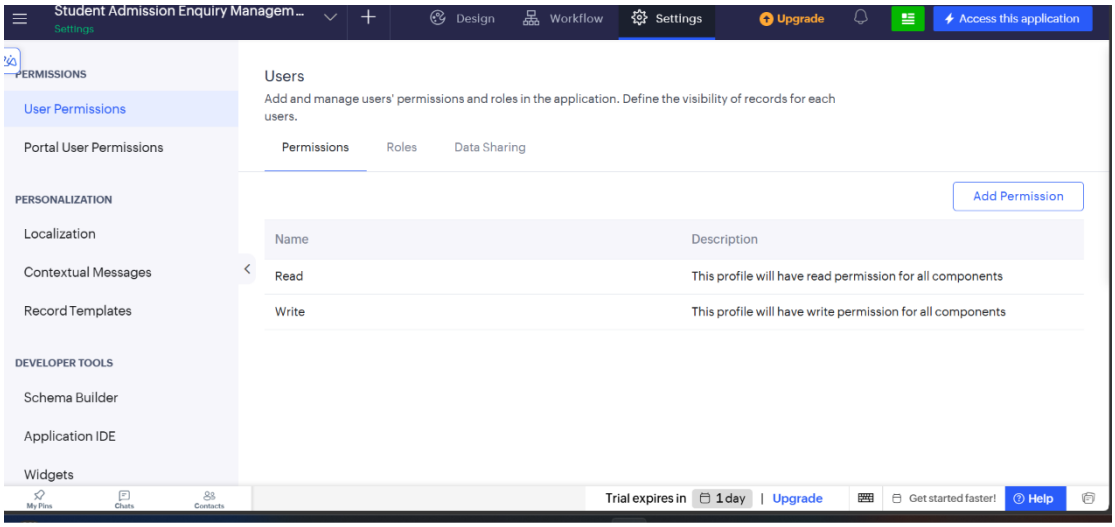

Procedure

1. Log in to Zoho Creator and open the existing **Student Admission Enquiry Management** application.
2. Navigate to **Settings** in the application editor.
3. Open **User Permissions** to manage application permissions and roles.
4. Select the **Roles** tab and verify the available roles, such as CEO, Admission_Cell, and Viewer.
5. Open the **Permissions** tab to view the existing permissions, such as Read and Write.
6. Open the Read permission and examine the module permissions for Admission_Enquiry_Form.
7. Configure viewing permissions to allow authorized users to access admission records and reports.
8. Configure editing and deletion permissions according to each user's responsibilities.
9. Assign the appropriate permissions to the respective roles, using the options available in Zoho Creator.
10. Save the permission settings and verify the role configuration.
11. Test the configured permissions to ensure that users can access only the functions permitted for their roles.

Help

Result

Thus, Role-Based Access Control was configured in Zoho Creator to manage user roles and permissions for the Student Admission Enquiry Management application, helping control access to admission records and application features.
